This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

Recommendations (optional): To strengthen Botium Toys' security posture and safeguard sensitive information, multiple security controls should be put in place. These include enforcing least privilege access, establishing a disaster recovery plan, implementing robust password policies, maintaining separation of duties, deploying an intrusion detection system (IDS), managing legacy systems, encrypting sensitive data, and using a password management system.

Addressing compliance gaps also requires Botium Toys to implement controls such as least privilege access, separation of duties, and data encryption. Additionally, the company should classify assets effectively to identify and apply further necessary controls, enhancing security and protection of sensitive information
